SUMMARY

Frontend Software Engineer in training, passionate about building useful, intuitive, and impactful digital experiences and driven by understanding not just how to write code but how and why it works. Brings a business-technology foundation from KNUST and hands-on full-stack experience through CodeTrain Africa, having built four projects spanning React, Tailwind CSS, and a Python/FastAPI AI application deployed on Vercel. Comfortable across the stack, quick to pick up new tools, and looking for an entry-level or internship role to grow into a well-rounded engineer who builds reliable technology and solves real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, Python

Frameworks & Libraries: React, Vite, Tailwind CSS, FastAPI

Tools & Platforms: Git, GitHub, VS Code, Vercel, Command Line, REST APIs

Concepts: Responsive Design, Component Architecture, Version Control, Debugging, Retrieval-Augmented Generation (RAG), API Integration

PROJECTS

JS Coding Tutor — AI Programming Tutor | *Python, FastAPI, OpenRouter API, RAG, Vercel*

- Built as part of CodeTrain Africa's AI Acceleration Program: a full-stack AI tutoring web app ("The Console Whisperer") that answers JavaScript questions through a streaming chat interface backed by a retrieval-augmented generation (RAG) knowledge base.
- Engineered an ingestion pipeline (`ingest.py`, `clean.py`) that indexes course material into a searchable knowledge base consumed by the FastAPI backend at query time.
- Integrated the OpenRouter LLM API with server-sent streaming responses and deployed the app as a serverless application on Vercel, including a dedicated endpoint for live in-browser JavaScript execution.

DentaCare (Clone Project) | *React, Vite, JavaScript, CSS, ESLint*

- Recreated a multi-section dental clinic website from a design reference as a componentized React application (Navbar, Hero, Services, Doctors, Testimonials, Blog, FAQ, Contact, Footer), configured with Vite for fast local development.

Coza Store (Clone Project) | *HTML5, Tailwind CSS, JavaScript, Font Awesome*

- Rebuilt a responsive e-commerce storefront UI from a design reference, including a sticky nav, hero banner, and cart/wishlist iconography, using Tailwind's utility-first CSS across breakpoints.

Horizon Offices (Clone Project) | *HTML5, Tailwind CSS, JavaScript*

- Recreated a marketing site UI for a multi-country flexible workspace provider (Ghana, Nigeria, Kenya) from a design reference, including a responsive card-based pricing/plans layout, using Tailwind CSS.

EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST), Ghana 2021

BSc, Business Administration — Business Information Technology | Second Class Upper Division

- Relevant coursework: Networking & Security, Operating Systems, Visual Basic Programming, Mobile Application Design, System Analysis & Design, Decision Support Systems, Introduction to Programming.

CodeTrain Africa — Software Engineering Bootcamp Ongoing, expected April 2027

Full-stack development, version control, system design, and collaborative programming.

Thrive Africa — Professional Certificate in Cybersecurity (CompTIA Security+) Essentials Program In Progress, 2026

CERTIFICATIONS & TRAINING

- IBM — Web Development Fundamentals (IBM SkillsBuild)
- Cisco — Introduction to Cybersecurity (Cisco Networking Academy)
- TryHackMe — Pre Security Learning Path (2026)
- Udemy — How to Become a Successful Software Programming Developer

EXPERIENCE & LEADERSHIP

National Service Personnel — GA East Municipal Assembly (*Ghana National Service Scheme*), 2021 – 2022

- Completed mandatory national service, applying IT and business-administration training in a public-sector professional environment.

Academic Tutor / Peer Support (Informal)

- Guided peers and junior students on academic responsibilities, IT concepts, and foundational programming skills.
- Actively mentors younger students and is building toward launching a technology company.
