

BLESS KOJO DANDZO

Aspiring Cybersecurity Analyst & Full-Stack Developer

Accra, Ghana • +233 555 211 417 • blesskojodandzo@gmail.com • linkedin.com/in/bless-kojo-dandzo • github.com/bkdandzo • tryhackme.com/p/blesskojodandzo17

PROFESSIONAL SUMMARY

Cybersecurity-focused Full-Stack Developer with a BSc in Business Information Technology (KNUST, Second Class Upper) and one year of hands-on IT operations experience in a live government environment. Proven ability to maintain critical infrastructure, manage sensitive data systems, and resolve technical issues under pressure. AWS re/Start Graduate with additional credentials from IBM and Cisco. Currently completing a Software Engineering bootcamp at CodeTrain Africa (April 2027), building with React, FastAPI, and Python — including a deployed RAG-powered AI application. Preparing for an MSc in Cybersecurity abroad. Seeking remote junior developer or cybersecurity analyst opportunities.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, Python

Frameworks & Libraries: React, Vite, Tailwind CSS, FastAPI

Cloud & Security: AWS (re/Start), Linux, IAM, Cloud Security Fundamentals, Network Security

Tools & Platforms: Git, GitHub, VS Code, Vercel, REST APIs, Command Line

Cybersecurity: TryHackMe (Pre-Security completed), SOC fundamentals, Threat Awareness, CompTIA Security+ (in progress)

Concepts: Responsive Design, Component Architecture, RAG Architecture, API Integration, Version Control, Debugging

EXPERIENCE

Management Information Systems Specialist

GA East Municipal Assembly — Ghana National Service Scheme

September 2021 – September 2022 | Greater Accra, Ghana

- Managed and maintained IT infrastructure across multiple municipal departments, ensuring consistent system uptime and reliability for daily government operations
- Provided first-line technical support to 50+ staff — diagnosing and resolving hardware, software, and network issues efficiently under operational pressure
- Administered digital data management systems handling sensitive citizen records for property and business rates — exposure to data integrity and access control
- Implemented routine security checks and preventive maintenance protocols across departmental systems, reducing unplanned downtime
- Installed and configured software applications across Windows environments, including user account management and access permission settings

AWS re/Start Program Graduate

Amazon Web Services (AWS)

2024 | Ghana (Remote)

- Completed intensive employer-recognised cloud computing program covering AWS core services, cloud architecture, and security fundamentals
- Gained hands-on experience with Linux command line, networking fundamentals, Python scripting, and cloud infrastructure management
- Developed foundational knowledge in cloud security, identity and access management (IAM), and AWS security best practices

Software Engineering Student

CodeTrain Africa — AI Acceleration Programme

April 2025 – April 2027 (expected) | Accra, Ghana

- Building full-stack web applications using HTML, CSS, JavaScript, React, Tailwind CSS, and Python/FastAPI
- Developed "The Console Whisperer" — a deployed RAG-powered AI tutoring application with a FastAPI backend, custom ingestion pipeline, and streaming chat interface
- Applying software engineering principles: version control, component architecture, API integration, and collaborative development

KEY PROJECTS

JS Coding Tutor — AI Programming Tutor | Python · FastAPI · OpenRouter API · RAG · Vercel

- Full-stack AI tutoring web app ("The Console Whisperer") answering JavaScript questions through a streaming chat interface backed by a retrieval-augmented generation (RAG) knowledge base
- Engineered an ingestion pipeline (ingest.py, clean.py) that indexes course material into a searchable knowledge base consumed by the FastAPI backend at query time
- Deployed as a serverless application on Vercel with a dedicated endpoint for live in-browser JavaScript execution — github.com/bkdandzo/JS-CodingTutor

DentaCare | React · Vite · Tailwind CSS · JavaScript

- Multi-section dental clinic website built as a componentised React application with Vite, covering Navbar, Hero, Services, Doctors, Testimonials, Blog, FAQ, Contact, and Footer

Coza Store | HTML5 · Tailwind CSS · JavaScript

- Responsive e-commerce storefront UI with sticky nav, hero banner, and cart/wishlist iconography using Tailwind utility-first CSS across all breakpoints

EDUCATION

BSc Business Administration — Business Information Technology

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi

2017 – 2021 | Second Class Upper Division

Relevant coursework: Networking & Security, System Analysis & Design, Mobile Application Design, Decision Support Systems, Introduction to Programming, Database Management, Information Technology for Business

West African Senior School Certificate Examination (WASSCE)

St. Augustine's College, Cape Coast

2014 – 2017

CERTIFICATIONS & TRAINING

- AWS — re/Start Graduate (Amazon Web Services, 2024)
- IBM — Web Development Fundamentals (IBM SkillsBuild, 2025)
- Cisco — Introduction to Cybersecurity (Cisco Networking Academy, 2020)
- TryHackMe — Pre-Security Learning Path completed (2026)
- Thrive Africa — CompTIA Security+ Essentials Programme (In Progress, 2026)
